

Candidate Epsilon

Senior DevOps & Infrastructure Engineer | epsilon@example.internal

Summary:

Systems automation and cloud infrastructure architect specializing in container orchestration, infrastructure as code, and CI/CD pipelines.

Technical Skills:

Cloud & Virtualization: AWS, Linux

Containers & Orchestration: Docker, Kubernetes

Automation & Tools: CI/CD, Terraform, Bash, Git, Python

Experience:

DevOps Architect - CloudCore Systems (2020 - Present)

- Automated immutable AWS cloud provisioning utilizing Terraform and Bash.
- Engineered continuous integration and delivery pipelines with Git and automated CI/CD stages.
- Administered multi-tenant Kubernetes clusters running containerized Docker microservices.
- Hardened production Linux servers and developed maintenance utilities in Python.

Education:

B.S. in Computer Engineering - Polytechnic University
