

Candidate Iota

Senior NLP Research Specialist | iota@example.internal

Summary:

Natural language processing researcher with deep expertise in neural sequence modeling, tokenization algorithms, and transformer architectures.

Technical Skills:

Languages: Python

Deep Learning & NLP: PyTorch, NLP, spaCy, scikit-learn, Deep Learning, Pandas, NumPy

Experience:

Lead NLP Researcher - CognitionAI Labs (2020 - Present)

- Researched novel transformer language models and attention architectures in PyTorch.
- Built domain-specific tokenizers and named entity recognition pipelines with spaCy and NLP algorithms.
- Evaluated model perplexity and classification benchmarks using scikit-learn and Pandas.
- Applied Deep Learning to unstructured legal document comprehension with NumPy.

Education:

M.S. in Artificial Intelligence - Research University
