

Candidate Zeta

Data Platform Engineer | zeta@example.internal

Summary:

Backend data platform specialist with 5 years of experience building resilient distributed ingestion pipelines and transactional databases.

Technical Skills:

Languages: Python, SQL

Data Technologies: PostgreSQL, Redis, Apache Spark, Pandas

Infrastructure: Docker, Linux, Git

Experience:

Data Engineer - StreamData Technologies (2021 - Present)

- Designed high-throughput batch ETL workloads using Apache Spark and Python.
- Optimized relational query plans and indexing strategies in PostgreSQL.
- Deployed Redis caching clusters to support sub-10ms data retrieval for downstream services.
- Packaged data extraction workers as Docker containers on Linux nodes.

Education:

B.S. in Computer Information Systems - Metropolitan University
