

Candidate Alpha

Machine Learning Engineer | alpha@example.internal | New York, NY

Summary:

Applied Data Scientist and ML Engineer with 6 years of experience building predictive models and NLP applications.

Technical Skills:

Languages: Python, SQL, C++

Frameworks & Libraries: PyTorch, scikit-learn, Pandas, NumPy, spaCy

Tools & Infrastructure: Docker, Git, Linux, Jupyter

Experience:

Senior ML Engineer · DataScale Inc. (2021 · Present)

- Developed NLP information extraction pipelines in Python using scikit-learn and spaCy.
- Trained neural network embeddings in PyTorch to cluster unstructured document archives.
- Preprocessed multi-gigabyte tabular datasets using Pandas and NumPy.
- Containerized model serving microservices using Docker for on-premises deployment.

Education:

B.S. in Computer Science · State University

Projects & Certifications:

- Open Source Contributor to scikit-learn documentation.
- Implemented automated CI/CD unit testing for ML model evaluation.
