

Candidate Beta

Senior Backend Engineer | beta@example.internal | Austin, TX

Summary:

Backend software architect with 7 years of experience engineering high-throughput REST APIs and distributed n

Technical Skills:

Languages: Python, Go, SQL

Frameworks: FastAPI, Flask, Django, SQLAlchemy

Databases & Cache: PostgreSQL, Redis, MySQL

DevOps & Cloud: Docker, Kubernetes, AWS, Git

Experience:

Lead API Architect · CloudStack Solutions (2020 · Present)

- Architected asynchronous REST API services using Python and FastAPI handling 15k requests/sec.
- Modeled and tuned transactional relational schemas in PostgreSQL.
- Implemented distributed caching layers using Redis to reduce database read latencies by 45%.
- Managed container deployments using Docker and Kubernetes on AWS infrastructure.
